

# Scientists Discover New Body Part!

<http://goo.gl/Fxy02Q>

## The Anterolateral Ligament (ALL)

published 11/6

Hypothesized in 1879 by Paul Segond (French surgeon)

Confirmed by University of Leuven's Dr. Steven Claes (Belgium)

Hypothesis - is there a structure responsible for complications in recovery from knee surgery?

Of interest to medical science, athletes, PT

Important to anyone who suffers knee injuries.

I learned that we don't even know everything about the human body! How cool is that?!
